Indirect Proof and Hypothetical Reasoning in Law Miklos Szabo: Practical Equivalence Ghita Holmstrom-Hintikka: Actions in Legal Argumentation Pierre de Fornel: Legal Consequences and the Hypothetical Character of Legal Norms

Legal theory, political sciences, sociology, philosophy, logic, artificial intelligence: there are many approaches to legal argumentation. Each of them provides specific insights into highly complex phenomena. Different disciplines, but also different traditions in disciplines (e.g. analytical and continental traditions in philosophy) find here a rare occasion to meet. The present book contains contributions, both historical and thematic, from leading researchers in several of the most important approaches to legal rationality. One of the main issues is the relation between logic and law: the way logic is actually used in law, but also the way logic can make law explicit. An outstanding group of philosophers, logicians and jurists try to meet this issue. The book is more than a collection of papers. However different their respective conceptual tools may be, the authors share a common conception: legal argumentation is a specific argumentation context.

How can fair cooperation and a stable peace be reached in the international realm? Peace, Justice and International Order discusses this question in the light of John Rawls' The Law of Peoples, offers a new approach to Rawls' international theory and contributes to the discourse on international peace and justice.

This work provides a rational framework for legislation. The unifying premise behind the essays is that, although legislation and regulation are the result of a

political process, legislation and regulation can be the object of theoretical study. The volume focuses on problems that are common to most European legal systems and the approach involves applying to legislative problems the tools of legal theory - hence 'legisprudence'. Whereas traditional legal theory deals predominantly with the application of law by the judge, legisprudence enlarges the field of study so as to include the creation of law by the legislator. The original essays published in this collection expose and develop a range of new insights into the relationship between legislative problems and legal theory in a way which will engage and interest legal scholars throughout the world.

Contents A. van Aaken: Synthesizing the Best of Two Worlds: A Combination of New Institutional Economics and Deliberative Theories D. Coskun: Law as symbolic form. Ernst Cassirer and the anthropocentric view of law L. De Sutter: How to Get Rid of Legal Theory? L. García Ruiz: On the Concept of Law and Its Place in the Legal-Philosophical Research N.
