Autonomy and Mental Disorder explores the nature and value of autonomy with reference to mental disorder, reflects on instances of mental disorder where autonomy is apparently compromised, and offers a systematic discussion of the underlying presuppositions of the present autonomy debates.

This chapter considers whether eating disordered behaviour is autonomous. This would have important ethical implications, as there is a prima facie ethical obligation to respect autonomous behaviour. It shows that eating disordered behaviour seems undermined by some defects in autonomy, such as defects in perception of hunger and satiety, defects in the ability to apply knowledge about food to ...

This book offers a new theory of federalism. The work critically discusses traditional federal theories and builds on theories that focus on the dynamics of federalism. It offers a definition of federalism and federal organizations that encompasses both new and old types of multi-tiered system. Unlike traditional federal theory, it is well-suited to research both multinational and mononational

Of

systems. It also takes into account the complexity of these systems, with bodies of governance at the local, regional, national, and supranational level. The book is divided into three parts: the first part outlines the contours of dynamic federalism, based on a critical overview of traditional federal theory; the second part develops comprehensive indexes to measure autonomy and cohesion of multi-tiered systems; and the third part focuses on the dynamics of federal organizations, with a special focus on institutional hubs for change. Dynamic Federalism will be an essential resource for legal, social, economic, and political scholars interested in federalism, regionalism, and de/centralization.

Indonesia has transformed from one of South East Asia's most repressive and centralised political systems to its most decentralised and democratic. Despite this, obstacles still remain that hinder Indonesia achieving the 'rule of law', and in particular, the country is consistently ranked as having one of the highest levels of corruption in the world. This book assesses Indonesia's anti-corruption reforms over the past decade, focusing on the Anti-corruption Commission (KPK) and the Anti-corruption Court (ACC). The book discusses how both institutions have been largely successful since they began operating on 2004. Before 2008, the KPK and ACC largely focused on mid-senior level targets and faced resistance primarily in the form of constitutional challenges to their jurisdictions and powers. From 2008, however, the KPK began targeting

politically-powerful figures, drawing resistance that now threatens the future efficacy of both institutions. It is largely in Indonesia's courtrooms and lawmaking institutions that key battles between reformists and those preferring the status quo have played out. This book describes and analyses these judicial processes and legal changes. It shows that despite persistent claims that Indonesia's legal system is dysfunctional, law is far from irrelevant in modern day Indonesia. The book is a useful contribution to South East Asian politics and Asian law.

contribution to contemporary debates about building institutions for human rights protection in the Asia-Pacific region, in the wake of ASEAN's establishment in 2009 of a sub-regional human rights commission. Drawing together leading scholarly voices, the book focuses on the systemic issue of institutionalising human rights protection in the Asia-Pacific. It critically examines the prospects for deepening and widening human rights institutions in the region, challenging the orthodox scepticism about whether the Asia-Pacific is "ready" for stronger human rights institutions and exploring the variety of possible forms that regional and sub-regional institutions might take. The volume also analyses the impediments to new institutions, whilst questioning the justifications for them. The collection provides a range of perspectives on the issues and many of the

The decentralization program that Indonesia embarked on in 1998 continues to unfold through manifold, sometimes contradictory processes. This working paper presents a concise and up-to-date overview of the aims, dimensions and dynamics of decentralization

Critiquing the State-centric and legalistic approach to implementing human rights, this book illustrates the efficacy of relying upon social institutions.

Business and Economic Education Science
2020 (ICE-BEES 2020). It focuses on the
relation of economics, business, education,
environment and sustainable development.
The issue of economics and sustainable
development is important today, especially
in the time of Covid-19, not only globally,
but also Indonesia nationally to the local
level. There are several important issues
related to this, both institutionally and the
relationships between individuals and
groups in supporting the agenda of
sustainable development. More than 150
manuscripts were presented at this
conference with around 49 of them
selected to be published in proceedings.
We hope by this conference, discussions
on the importance of sustainable
development will increasingly become an
important concern together and bring
better response from the government and
social relations for development.

Despite its overwhelmingly Muslim majority, Indonesia has always been seen as exceptional for its diversity and pluralism. In recent years, however, there has been a rise in "majoritarianism", with resurgent Islamist groups pushing hard to impose conservative values on public life – in many cases with considerable success. This has sparked growing fears for the future of basic human rights, and, in particular, the rights of women and sexual and ethnic minority groups. There have, in fact, been more prosecutions of unorthodox religious groups since the fall of Soeharto in 1998 than there were under the three decades of his authoritarian rule. Some Indonesians even feel that the pluralism they thought was constitutionally guaranteed by the national ideology, the Pancasila, is now under threat. This book contains essays

exploring these issues by prominent scholars, lawyers and activists from within Indonesia and beyond, offering detailed accounts of the political and legal implications of rising resurgent Islamism in Indonesia. Examining particular cases of intolerance and violence against minorities, it also provides an account of the responses offered by a weak state that now seems too often unwilling to intervene to protect vulnerable minorities against rising religious intolerance.

The presidency of Susilo Bambang Yudhoyono (2004-14) was a watershed in Indonesia's modern democratic history. Yudhoyono was not only the first Indonesian president to be directly elected, but also the first to be democratically re-elected. Coming to office after years of turbulent transition, he presided over a decade of remarkable political stability

and steady economic growth. But other aspects of his rule have been the subject of controversy. While supporters view his presidency as a period of democratic consolidation and success, critics view it as a decade of stagnation and missed opportunities. This book is the first comprehensive attempt to evaluate both the achievements and the shortcomings of the Yudhoyono presidency. With contributions from leading experts on Indonesia's politics, economy and society, it assesses the Yudhoyono record in fields ranging from economic development and human rights, to foreign policy, the environment and the security sector.
