This textbook is appropriate for senior undergraduate and first year graduate students in mechanical and automotive engineering. The contents in this book are presented at a theoretical-practical level. It explains vehicle dynamics concepts in detail, concentrating on their practical use. Related theorems and formal proofs are provided, as are real-life applications. Students, researchers and practicing engineers alike will appreciate the user-friendly presentation of a wealth of topics, most notably steering, handling, ride, and related components. This book also: Illustrates all key concepts with examples Includes exercises for each chapter Covers front, rear, and four wheel steering systems, as well as the advantages and disadvantages of different steering schemes Includes an emphasis on design throughout the text, which provides a practical, hands-on approach

For over ten years, Top Gear has been travelling all over Britain in the course of making the world ' s best programme about cars, driving, and three men in smart-casual clothes shouting at each other. So, who better to assemble a guide to Britain itself with all its glories, quirks and multiple words for bread rolls? This book is not only a guide for outsiders; it is an invaluable reference manual for Britons themselves, like a mirror held up to our very souls.* Join us then, as we travel from A-Z cataloguing and making moderately flippant remarks about every aspect of life and living in the best country in the world after New Zealand, Denmark, probably Canada and some bits of France. *Although in this case, a mirror that has been dropped and then run over by a small lorry but don ' t worry, some bits of it still just about work.

For over 25 years Rob Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In Memoirs of a Hack Mechanic, Rob Siegel shares his secrets to buying, fixing, and driving cool cars without risking the kids' tuition money or destroying his marriage. And that's something to brag about considering the dozens of cars, including twenty-five BMW 2002s, that have passed through his garage over the past three decades. With a steady dose of irreverent humor, Memoirs of a Hack Mechanic blends car stories, DIY advice, and cautionary tales in a way that will resonate with the car-obsessed (and the people who love them).

"Incorporates obvious and subtle shifts in car-body shape. Commentary focuses on character and cultural iconography as well as practicality and reliability. The illustrations stylize the placement of wheels and chassis and the distinctive qualities of passenger compartments...valuable resource"--Booklist Cars today fit a fairly small number of body types--sedan, coupe, station wagon, SUV, hatchback and a few others. The meanings of these familiar terms have changed over the decades as automotive design has evolved. Along the way, a greater number of earlier body types have fallen out of use and become historical curiosities. Who today can identify a charabanc, a dos-a-dos or even a phaeton? In this expanded second edition, the dictionary defines with clear line drawings all distinct body types from the early days of the automobile, many of which were derived from established models of horse-drawn vehicles. Entries describe popular types and variations from different countries and time periods. Subtypes and subtle distinctions are explained and common misuses of terms and designations are clarified.

Jeremy Clarkson gets under the bonnet in Clarkson on Cars - a collection of his motoring journalism. Jeremy Clarkson has been driving cars, writing about them and occasionally voicing his opinions on the BBC's Top Gear for twenty years. No one in the business is taller. In this collection of classic Clarkson, stretching back to the mid-1980s, he's pulled together the car columns and stories with which he made his name. As coal mines closed and house prices exploded to a soundtrack of men in make-up playing synthesizers, Jeremy was already waxing lyrical on topics as useful and diverse as: * The perils of bicycle ownership * Why Australians - not Brits - need bull bars * Why soon only geriatrics will be driving BMWs * The difficulty of deciding on the best car for your wedding * Why Jesus's dad would have owned a Nissan Bluebird * And why it is that bus lanes cause traffic jams Irreverent, damn funny and offensive to almost everyone, this is writing with its foot to the floor, the brake lines cut and the speed limit smashed to smithereens. Sit back and enjoy the ride. Praise for Jeremy Clarkson: 'Brilliant . . . laugh-out-loud' Daily Telegraph 'Outrageously funny . . . will have you in stitches' Time Out 'Very funny . . . I cracked up laughing on the tube' Evening Standard
