THE AFRICAN ORIGINS OF CIVILIZATION, MYSTICAL RELIGION AND YOGA PHILOSOPHY 8 1/2" X 11" Part 1, in one volume First Edition Three volumes in one. Over the past several years I have been asked to put together in one volume the most important evidences showing the correlations and common teachings between Kamitan (Ancient Egyptian) culture and religion and that of India. The questions of the history of Ancient Egypt, and the latest archeological evidences showing civilization and culture in Ancient Egypt and its spread to other countries, has intrigued many scholars as well as mystics over the years. Also,

The possibility that Ancient Egyptian Priests and Priestesses migrated to Greece, India and other countries to carry on the traditions of the Ancient Egyptian Mysteries, has been speculated over the years as well. In chapter 1 of the book *Egyptian Yoga The Philosophy of Enlightenment*, 1995, I first introduced the deepest comparison between Ancient Egypt and India that had been brought forth up to that time. Now, in the year 2001 this new book, *THE AFRICAN ORIGINS OF CIVILIZATION, MYSTICAL RELIGION AND YOGA PHILOSOPHY*, more fully explores the motifs, symbols and philosophical correlations between Ancient Egyptian and Indian mysticism and clearly shows not only that Ancient Egypt and India were connected culturally but also spiritually. How does this knowledge help the spiritual aspirant? This discovery has great importance for the Yogis and mystics who follow the philosophy of Ancient Egypt and the mysticism of India. It means that India has a longer history and heritage than was previously understood. It shows that the mysteries of Ancient Egypt were essentially a yoga tradition which did not die but rather developed into the modern day systems of Yoga technology of India. It further shows that African culture developed Yoga Mysticism earlier than any other civilization in history. All of this expands our understanding of the unity of culture and the deep legacy of Yoga, which stretches into the distant past, beyond the Indus Valley civilization, the earliest known high culture in India as well as the Vedic tradition of Aryan culture. Therefore, Yoga culture and mysticism is the oldest known tradition of spiritual development and Indian mysticism is an extension of the Ancient Egyptian mysticism. By understanding the legacy which Ancient Egypt gave to India the mysticism of India is better understood and by comprehending the heritage of Indian Yoga, which is rooted in Ancient Egypt the Mysticism of Ancient Egypt is also better understood. This expanded understanding

allows us to prove the underlying kinship of humanity, through the common symbols, motifs and philosophies which are not disparate and confusing teachings but in reality expressions of the same study of truth through metaphysics and mystical realization of Self.

The Sumerian Problem HAS BEEN SOLVED! And the solution is African! According to mainstream historians the Sumerians of ancient southern Iraq founded the world's first civilization. They are supposed to have spoken a language which is not genetically related to any known language. This is known as the Sumerian Problem. This book represents the greatest discovery in ancient history for the last hundred years. It demonstrates that Sumerian was genetically related to the Niger-Congo languages of West Africa. Their descendants are

the African Diaspora of North and South America and the Caribbean. Many claimed to have solved the Sumerian problem in the past. Hermslein's differs from previous attempts by first showing the reader how to identify genetically related languages through recurrent sound correspondences in basic vocabulary. He then gives examples from acknowledged genetic relationships such as Germanic to show the reader what the evidence should look like. The author also shows what false correspondences look like and how to tell the difference. He also makes use of a number of tests that would determine whether languages are related using probability. This is CLEARLY UNLIKE ANY PREVIOUS ATTEMPT at solving the Sumerian problem. The author reconstructs the epic voyage that took the ancestors of the Sumerians from a homeland in West Africa to Djibouti before making a journey by sea, around Oman and to the head of the Persian Gulf. The other major discovery in the book is that the Sumerians had a much more advanced system of astronomy than has been supposed. The constellations had geographic associations in the Classical period through myth. Hermslein shows how the geographic coordinates of the associated places closely correspond to the celestial coordinates of certain points within the constellations. It is impossible to develop such a system without knowing the earth is round. The text supplying the point of origin for the system of geo-celestial coordinate correspondence is from the Sumerian period. Two amazing discoveries in one book. Both humanity and civilization have an African origin! The ancients knew a lot more than we realized!

This expanded edition continues Diop's campaign for the political and economic unification of the nations of black Africa. It concludes with a lengthy interview with Diop.

Challenging societal beliefs, this volume rethinks African and world history from an Afrocentric perspective.

When the vast majority of mankind in the "Western World" refer to a Slave it is the African-American or his African ancestor is mean. This image has been perpetuated by every branch of "Western" education and religion, both Christian (Roman Catholic and Protestant) and Jewish (all branches of Judaism); and presented in a manner that would suggest an origin dating back to a time of PURITY in ancient Europe amongst the Greeks and Romans; and origins that insinuate the beginning of WORLD CIVILIZATION, thus the terms: "Greek philosophy" and "Western Civilization

For centuries the world has been misled about the original source of the Arts and Sciences; for centuries Socrates, Plato and Aristotle have been falsely idolized as models of intellectual greatness; and for centuries the African continent has been called the Dark Continent, because Europe coveted the honor of transmitting to the world, the Arts and Sciences. It is indeed surprising how, for centuries, the Greeks have been praised by the Western World for intellectual accomplishments which belong without a doubt to the Egyptians or the peoples of North Africa.
