Hegemann and Peets American Vitruvius - Werner Hegemann ...

Since Vitruvius describes himself as an old man, it may be inferred that he was also active during the time of Julius Caesar. Vitruvius himself tells of a basilica he built at Fanum (now Fano). De architectura was based on his own experience, as well as on theoretical works by famous Greek architects such as Hermogenes. The treatise covers almost every aspect of architecture, but it is limited, since it is based primarily on Greek models, from which Roman architecture was soon decisively to ...

This classic encyclopedia of urban designs contains more than 1,200 plans, elevations, and perspective views. Its European and American buildings range from Renaissance structures to those of the 20th century.

Hegemann and Peets' classic work on city planning was first published in 1922. Today, their reference serves as one of the foundation texts for New Urbanism and associated movements. Civic Art presents over 1200 examples of urban planning principles spanning from classic Roman and Greek times through turn of the twentieth century American design. Hegemann and Peets' work provides a highly relevant context through which to evaluate modern city planning.

"American Vitruvius: an Architects' Handbook of Civic Art. At the end of the second decade of this [the twentieth] century, Werner Hegemann, a German-born urban planning theorist and practitioner, and Elbert Peets, a young American recently graduated from Harvard University's School of Landscape Architecture, joined together in Wisconsin in a professional partnership. The association of these two students of American urbanism culminated in 1922 with The American Vitruvius: an Architects' Handbook of Civic Art, a critical text that played an essential role in the definition and promotion of modern American city planning. American Vitruvius offers the reader an atlas of design solutions and advocates a humanistic, as well as rational, development of the urban environment. Princeton Architectural Press has reprinted the entire original text including the book's 1203 plates. These illustrations consist of plans, elevations, and perspective views of both European and American cities, spanning in date from the Renaissance to the twentieth century. The republication of this volume suggests the relevance of Hegemann and Peets' approach for contemporary city planning. Today, in the midst of an era responding to the de-humanization of the city, American Vitruvius offers a reconciliation of artistic aspects of civic art with scientific theory of city planning – the authors insist upon a city that allows its residents both pleasure and freedom of expression"—Front flap.

Hegemann and Peets' classic work on urban planning is an encyclopedic compilation of over twelve hundred illustrations, photographs, and diagrams. Their work was first published in 1922 and presented for the first time a comprehensive survey of what we would consider modern urban planning or urban design principles. Their work, often referred to simply as 'Civic Art, ' remained out of print for a number of years. This compact edition, part of the 'Fundamentals in Urban Planning' series, presents the full text and graphics of the original edition in an affordable and portable version. CONTENTS: I. The Modern Revival of Civic Art II. Plaza and Court Design in Europe III. The Grouping of Buildings in America IV. Architectural Street Design V. Garden Art as Civic Art VI. City Plans as Unified Designs VII. The Plan of Washington

A historical study of Vitruvius's De architectura, showing that his purpose in writing "the whole body of architecture" was shaped by the imperial Roman project of world domination. Vitruvius's De architectura is the only major work on architecture to survive from classical antiquity, and until the eighteenth century it was the text to which all other architectural treatises referred. While European classicists have focused on the factual truth of the text itself, English-speaking architects and architectural theorists have viewed it as a timeless source of valuable metaphors. Departing from both perspectives, Indra Kagis McEwen examines the work's meaning and significance in its own time. Vitruvius dedicated De architectura to his patron Augustus Caesar, the first Roman emperor, whose rise to power inspired its composition near the end of the first century B.C. McEwen argues that the imperial project of world dominion shaped Vitruvius's purpose in writing what he calls "the whole body of architecture." Specifically, Vitruvius's aim was to present his discipline as the means for making the emperor's body congruent with the imagined body of the world he would rule. Each of the book's four chapters treats a different Vitruvian "body." Chapter 1, "The Angelic Body," deals with the book as a book, in terms of contemporary events and thought, particularly Stoicism and Stoic theories of language. Chapter 2, "The Herculean Body," addresses the book's and its author's relation to Augustus, whose double Vitruvius means the architect to be. Chapter 3, "The Body Beautiful," discusses the relation of proportion and geometry to architectural beauty and the role of beauty in forging the new world order. Finally, Chapter 4, "The Body of the King," explores the nature and unprecedented extent of Augustan building programs. Included is an examination of the famous statue of Augustus from Prima Porta, sculpted soon after the appearance of De architectura.
