Two of Britain's leading cultural commentators provide a hilarious guide to the various trendy discourses that academics have churned out for decades. Covering such schools of thought as difference feminism, deconstruction, and the sociology of knowledge, the author reveals that clotted jargon, tortured syntax, and unreadable style hides the fact that nothing new is being said. This ironic guide offers an array of ludicrous, exaggerated, self-contradicting definitions and explanations of popular intellectual jargon, poking witty fun at postmodern theorists from Adorno to Jacques Derrida and Michel Foucault, and arming the reader with enough knowledge to salt them into the conversation if ever trapped at a party with a crowd of trendy academics.

Truth has always been a central preoccupation of philosophy in allits forms and traditions. Yet in the late twentieth century truth became suddenly rather unfashionable. The precedence given to assortedpolitical and ideological agendas, along with the rise of relativism, postmodernism and pseudoscience in academia, led to a decline both of truth as a serious subject, and an intellectual tradition thatbegan with the Enlightenment. Why Truth Matters is a timely, incisive and entertaining look at how and why modern thought and culture lost sight of the importance of truth. It is also an eloquent and inspiring argument for restoring truth to its rightful place. Jeremy Stangroom and Ophelia Benson, editors of the successful butterfliesandwheels website-itself established to "fight fashionable nonsense"-identify and debunk such senselessness, and the spurious claims made for it, in all its forms. Their account ranges over religious fundamentalism, Holocaust denial, the challenges of postmodernism and deconstruction, the wilful misinterpretation of evolutionary biology, identity politics and wishful thinking. Why Truth Matters is both a rallying cry for the enlightened vision and an essential read for anyone who's everbeen bored, frustrated, bewildered or plain enraged by the worst excesses of the fashionable intelligentsia.

In 1996 physicist Alan Sokal published an essay in Social Text--an influential academic journal of cultural studies--touting the deep similarities between quantum gravitational theory and postmodern philosophy. Soon thereafter, the essay was revealed as a brilliant parody, a catalog of nonsense written in the cutting-edge but impenetrable lingo of postmodern theorists. The event sparked a furious debate in academic circles and made the headlines of newspapers in the U.S. and abroad. Now in Fashionable Nonsense: Postmodern Intellectuals' Abuse of Science, Sokal and his fellow physicist Jean Bricmont expand from where the hoax left off. In a delightfully witty and clear voice, the two thoughtfully and thoroughly dismantle the pseudo-scientific writings of some of the most fashionable French and American intellectuals. More generally, they challenge the widespread notion that scientific theories are mere "narrations" or social constructions.

An exploration of the role that religion and culture play in the oppression of women
Ophelia Benson and Jeremy Stangroom, philosophers and authors, ask probing questions about the way that religion shields the oppression of women from criticism and why many Western liberals, leftists, and feminists have remained largely silent on the subject. Throughout the world, a great many women lead lives of misery and sometimes plain horror. They are often considered and treated as the property of men and have few, if any, rights. Such treatment is generally sustained and protected by a combination of religion and culture. Does God Hate Women? explores instances of the oppression of women in the name of religious and cultural norms and how these issues play out both in the community and in the political arena. Drawing on philosophical concerns such as truth, relativism, knowledge, and ethics, Benson and Stangroom assess the current situation and provide a rallying call for a progressive politics that is committed to universal values.

Great Thinkers, A-Z brings together 100 short, accessible snapshots of the people who have shaped Western thought from the ancient Greeks to today. The snapshots, written by the world's leading experts, describe a major thinker's life and work with suggestions for further reading on each one. Covering philosophers as well as cultural and scientific thinkers-such as Foucault, Darwin, Einstein and Freud-who have had a major impact on philosophy, Great Thinkers, A-Z is the ideal book for anyone interested in the history of ideas and in contemporary thought. Entries include: Adorno, Arendt, Aquinas, Aristotle, Augustine, Avicenna, Ayer, Bacon, Baudrillard, de Beauvoir, Benjamin, Bentham, Bergson, Berkeley, Boethius, Brentano, Butler, Camus, Carnap, Chomsky, Churchland, Cixous, Collingwood, Comte, Craik, Croce, Darwin, Davidson, Deleuze, Dennett, Descartes, Derrida, Dewey, Dilthey, Duns Scotus, Einstein, Foucault, Frege, Freud, Gadamer, Godel, Habermas, Hayek, Hegel, Heidegger, Hobbes, Hume, Husserl, Irigaray, James, Kant, Kierkegaard, Kripke, Kristeva, Kuhn, Leibniz, Levinas, Lewis, Locke, Machiavelli, MacIntyre, Marx, Macmurray, Merleau-Ponty, Mill, Montaigne, Moore, Nagel, Negri, Nietzsche, Nozick, Nussbaum, Paine, Pascal, Peirce, Plato, Plotinus, Popper, Putnam, Pythagoras, Quine, Rawls, Rorty, Rousseau, Russell, Santayana, Sartre, Schopenhauer, Searle, Seneca, Sidgwick, Singer, Socrates, Spinoza, Taylor, Turing, Vico, Weil, Whitehead, Wittgenstein, Zeno

Philosophy has been under way for more than two thousand years. The Great Philosophers traces the biggest and most influential thoughts in philosophy's long stride through history, beginning with the Ancient Greeks and Early Romans, the first philosophical thinkers in the West, to whom much is owed. How their concerns became the concerns of t...

No matter how you view philosophy, regardless of what you think it is, this series from The Independent will give you a strong sense of the life and work of the very best thinkers in the philosophical neighbourhood, dealing carefully and rationally with the most human of questions, the hardest questions, the questions which matter most. William James, in his last great work Some Problems of Philosophy, wrote that philosophy 'sees the familiar as if it were strange, and the strange as if it were familiar. It can take things up and lay them down again. Its mind is full of air that plays round every subject . It rouses us from our native dogmatic slumber and breaks up our caked prejudices'. This series shows how philosophical argument can be profoundly disconcerting in this way; how it leads people to question everything they thought they knew about existence, knowledge and ethics.

>

Throughout history, philosophers have devised ingenious thought experiments to find solutions to the most fiendish of problems. The world's greatest thinkers have grappled with puzzles such as Free Will, Personal Identity and the Problem of Other Minds. Step into this intriguing world and try your own hand at such conundrums. Weigh up the possible outcomes to decide What Will the Crocodile Do?, ask yourself Can You Be Responsible for What is Unavoidable?, shake up your logical thinking and ponder Is It Rational to Believe in Monsters under the Bed? and figure out an honorable solution to Should You Run Over the Fat Man? This book will hone your mental skills, blow your preconceptions out of the water, and make you think twice about your daily decisions.

Following on from the success of the first edition of What Philosophers Think, this second edition brings together a collection of interviews with some of the world's most important and influential philosophers and intellectuals and leading figures in the arts and politics, including: Bernard Williams - Onora O'Neill - Philippa Foot - Philip Pullman - Bhikhu Parekh - Slavoj Žižek - AC Grayling - Igor Alexander - Alexander McCall Smith - Daniel Dennett - Oliver Letwin
The interviews - all revised and expanded from The Philosopher's Magazine - cover a wide range of issues and offer a unique insight into the minds behind the great ideas of today. Always lively, provocative and accessible, these interviews get to the heart of today's most vital questions.
