1. Leaving the EU won ’ t “ solve our immigration problem ” . More migrants come to the UK from outside the EU than they do from inside the EU. The government has had a number of years to control the borders when it comes to non EU migrants.

In June 2016, the United Kingdom shocked the world by voting to leave the European Union. As this book reveals, the historic vote for Brexit marked the culmination of trends in domestic politics and in the UK’s relationship with the EU that have been building over many years. Drawing on a wealth of survey evidence collected over more than ten years, this book explains why most people decided to ignore much of the national and international community and vote for Brexit. Drawing on past research on voting in major referendums in Europe and elsewhere, a team of leading academic experts analyse changes in the UK’s party system that were catalysts for the referendum vote, including the rise of the UK Independence Party (UKIP), the dynamics of public opinion during an unforgettable and divisive referendum campaign, the factors that influenced how people voted and the likely economic and political impact of this historic decision.

This updated guide examines the different relationships between the various tiers of government in the UK and the EU, and how the EU’s powers affect the UK, from a range of perspectives. It evaluates the role of the media, political parties, pressure groups, social media and the ever-changing position of public opinion, and places the relationship in its historical context to show how it has evolved over time. Each chapter includes an introduction, learning goals, a glossary, likely exam questions, helpful websites and suggestions for further reading. This new edition has two new chapters, ‘Europeanisation’ and ‘The British Media and the EU’, includes the fallout from the 2015 UK Parliament general election and the 2014 European Parliament election and draws on freshly updated examples, tables and figures updated throughout.

On 18th April 2017, Theresa May stunned Britain by announcing a snap election. With poll leads of more than 20 points over Jeremy Corbyn ’ s divided Labour Party, the first Tory landslide since Margaret Thatcher ’ s day seemed certain. Seven weeks later, Tory dreams had turned to dust. Instead of the 100-seat victory she ’ d been hoping for, May had lost her majority, leaving Parliament hung and her premiership hanging by a thread. Labour MPs, meanwhile, could scarcely believe their luck. Far from delivering the wipe-out that most predicted, Corbyn ’ s popular, anti-austerity agenda won the party 30 seats, cementing his position as leader and denying May the right to govern alone. This timely and indispensable book gets to the bottom of why the Tories failed, and how Corbyn ’ s Labour overcame impossible odds to emerge closer to power than at any election since the era of Tony Blair. Who was to blame for the Tories ’ mistakes? How could so many politicians and pollsters fail to see what was coming? And what was the secret of Corbyn ’ s apparently unstoppable rise? Through new interviews and candid private accounts from key players, political journalists Tim Ross and Tom McTague set out to answer these questions and more, piecing together the inside story of this most dramatic and important of elections.

Long-term social and demographic changes - and the conflicts they create - continue to transform British politics. In this accessible and authoritative book Sobolewska and Ford show how deep the roots of this polarisation and volatility run, drawing out decades of educational expansion and rising ethnic diversity as key drivers in the emergence of new divides within the British electorate over immigration, identity and diversity. They argue that choices made by political parties from the New Labour era onwards have mobilised these divisions into politics, first through conflicts over immigration, then through conflicts over the European Union, culminating in the 2016 EU referendum. Providing a comprehensive and far-reaching view of a country in turmoil, Brexitland explains how and why this happened, for students, researchers, and anyone who wants to better understand the remarkable political times in which we live.

Why are the British so Euro-sceptic? Forget about tedious treaties, party politics or international relations. The real reason is that the British do not feel European. This book explores and explains the cultural divide between Britain and Europe, where it comes from and how it manifests itself in everyday life and the academic world.

Never in the lifetime of most British adults has there been such uncertainty about the future of the political and governing institutions of the state. Brexit has the potential to change everything – from the shape of government institutions, to the main political parties, from Britain’s relationship with its near neighbour Ireland to its international trading. The idealists of the Leave campaign won their vote in 2016. But now the realists are gently taking over. Here, Denis MacShane explains how the Brexit process will be long and full of difficulties – arguing that a ‘Brexiternity’ of negotiations and internal political wrangling in Britain lies ahead.

A magisterial and profoundly perceptive survey of Britain’s post-war role on the global stage, from Suez to Brexit. ‘Admirably lucid and measured, as well as studded with sharp pen portraits of the key players, Britain Alone gives us the fullest long-run political and diplomatic narrative yet of Britain’s fateful, tragi-comic road to Brexit.’ DAVID KYNASTON ‘Philip Stephens has produced that rare thing - an instant classic. Britain Alone is the codebook we need to unravel the six and a half decades between Suez and Brexit, and Stephens is a master of historical codebreaking.’ PETER HENNESSY ‘How might we celebrate Britain’s undoubted strengths while accepting that we have slipped from the top table? How can we act as a great nation while no longer pretending to be a great power? How might we be European and global? In 1962 the American statesman Dean Acheson famously charged that Britain had lost an empire and failed to find a new role. Nearly sixty years later the rebuke rings true again. Britain’s postwar search for its place in the world has vexed prime ministers and government since the nation’s great victory in 1945: the cost of winning the war was giving up the empire. After the humiliation of Anthony Eden’s Suez expedition, Britain seemed for a time to have found an answer. Clinging to its self-image as a great island nation, it would serve as America’s best friend while acknowledging its geography by signing up to membership of the European Union. Never a comfortable balancing act, for forty years it appeared to work. In 2016 David Cameron called the Brexit referendum and blew it up. Award-winning journalist Philip Stephens paints a fascinating portrait of a nation struggling to reconcile its waning power with past glory. Drawing on decades of personal contact and interviews with senior politicians and diplomats in Britain, the United States and across the capitals of Europe, Britain Alone is a vivid account of a proud nation struggling to admit it is no longer a great power. It is an indispensable guide to how we arrived at the state we are in. ‘Compelling, informative and readable. . . offers much-needed substance.’ FINANCIAL TIMES ‘Fascinating.’ IRISH TIMES ‘Commanding.’ SCOTSMAN ‘A magnificent, exhilarating book, laying bare the contradictions, misunderstandings and delusions that led Britain first to build a bridge across the Channel and then bulldoze it. . . The book is much more than Brexit.’ PROSPECT

FULLY UPDATED Arron Banks enjoyed a life of happy anonymity flogging car insurance in Bristol until he dipped his toes into the sharkinfested waters of politics and decided to plunge right in. Charging into battle for Brexit, he tore up the political rule book, sinking £8 million of his personal fortune into a mad-cap campaign targeting ordinary voters up and down the country. His anti-establishment crusade upset everyone from Victoria Beckham to NASA and left MPs open-mouthed. Lurching from comedy to crisis (often several times a day), he found himself in the glare of the media spotlight, fending off daily bollockings from Nigel Farage and po-faced MPs. From talking Brexit with Trump and trying not to embarrass the Queen, to courting communists and wasting a fortune on a pop concert that descended into farce, this is his honest, uncensored and highly entertaining diary of the campaign that changed the course of history.

The traumatic debates provoked by the EU referendum have subjected the idea of British identity to relentless and painful interrogation. How might Britain as a multinational state understand its own defining moral and political commitments in relation to its European neighbours? If, as many suggest, a resurgence of English nationhood has been the driving force behind Brexit, how might the Church of England, as the ‘ national Church ’ in England, and its neighbouring Anglican Churches, respond to this and the many other missional challenges they face? Those of us still wondering what to make of Brexit – including reflective Christians, politicians, journalists, think-tanks and religious leaders – will find much to stimulate thought and discussion here. The contributors have a wealth of specialist knowledge of the churches, Brexit and the EU; they draw on this and the legacies of Anglican – and more broadly Christian – social and political theology to offer their rich and nuanced responses to a range of crucial questions. ‘ Seeks to challenge Christians of all views to imagine a future with hope. ’ Dr Anna Rowlands
