Laws exist to incentivize us to act in a certain manner, in accordance with the policies that our community has deemed right for us. And when we disagree with those laws, we must re-examine our policies, and thus our beliefs and ideas, to decide whether our community has changed. This is a book about law and public policy—about the ideas and the rules we build to implement those rules. While similar books have looked at public policy and public administration in an effort to explain how the government works, and others have considered the foundations of the legal system to understand the rulemaking institutions, this book takes a different approach. In this ground-breaking new textbook, author Kevin Fandl develops a complete picture of society, from idea to action -- by examining laws through the lens of policy, and vice versa. This holistic approach gives readers a chance to see not only why certain rules exist, but how those rules evolved over time and the events that inspired them. It offers readers an opportunity not only to see but also to participate in the process of forming the structures that shape our society. This textbook is divided into two sections. The first section provides readers with the tools that they will need to digest the policies and laws that surround them. These tools include a historical deep dive into the foundations of the governance structure in the United States and beyond, an important examination of civics and a reminder of the importance of engaging in the policymaking process, a careful breakdown of the institutions that form the backbone of the law and policy-making institutions in the United States, and finally critical thinking including practical tools to find reliable sources for news, research, and other types of information. The second section of the text is comprised of subject-matter analyses. These subject-based chapters, written by experts on the topic at hand begin with a historical perspective, followed by a careful examination of the key policies and laws

that inform that field. Each chapter highlights key vocabulary, provides practical vignettes to add context to the writing, explores a unique global component to compare perspectives from communities worldwide, and includes a number of discussion questions and recommended readings for further examination. This textbook is tailored specifically for undergraduate and graduate students of public policy, to introduce them to the role of law and legal institutions as facilitators and constraints on public policy, exploring those laws in a range of relevant policy contexts with the help of short case studies.

The Law and Policy of Ecosystem Services is the first comprehensive exploration of the status and future of natural capital and ecosystem services in American law and policy. The book develops a framework for thinking about ecosystem services across their ecologic, geographic, economic, social, and legal dimensions and evaluates the prospects of crafting a legal infrastructure that can help build an ecosystem service economy that is as robust as existing economies for manufactured goods, natural resource commodities, and human-provided services. The book examines the geographic, ecological, and economic context of ecosystem services and provides a baseline of the current status of ecosystem services in law and society. It identifies shortcomings of current law and policy and the critical areas for improvement and forges an approach for the design of new law and policy for ecosystem services. Included are a series of nine empirical case studies that explore the problems caused by society's failure to properly value natural capital. Among the case study topics considered are water issues, The Conservation Reserve Program, the National Conservation Buffer Initiative, the agricultural policy of the European Union, wetland mitigation, and pollution trading.

The Law and Policy of Ecosystem Services is a groundbreaking look at the question of whether and how law and policy can shape a sustainable system of ecosystem service management. It is an accessible and informative work for faculty, students, and policy makers concerned with ecology, economics, geography, political science, environmental studies, law, and related fields.

This thoroughly updated new edition of the classic, market-leading textbook is required reading for all students of WTO law.

This book offers a comprehensive introduction to law and policy responses to contemporary problems in Latin America, such as human rights violations, regulatory dilemmas, economic inequality, and access to knowledge and medicine. It includes 19 chapters written by sociologists, lawyers, and political scientists on the transformations of courts, institutions and rights protection in Latin America, all of which stem from presentations at conferences in Oxford and UCL organised by the editors. The contributors present original analyses based on rigorous research, innovative case-studies, and interdisciplinary perspectives, all written in an accessible style. Topics include the Inter-American Court of Human Rights, institutional design, financial regulation, competition, discrimination, gender quotas, police violence, orphan works, healthcare, and environmental protection, among others. The book will be of interest to students and scholars interested in policymaking, public law, and development.

across a variety of major areas – from energy to food, across common pool resources, and shifting investments to capitalize locally-connected and mission-driven businesses. The authors take the approach that the challenges are much broader than setting parameters around pollution, and go to the heart of the dominant global political economy. It explores the values needed to transform our current economic system into a new economy supportive of ecological integrity, social justice, and vibrant democracy.

This book explores the convergence of law and public policy. Drawing on case studies from Asia, Europe, the Middle East and Australia, it examines how judicial and political institutions are closely linked to the socio-economic concerns of the citizens. The essays argue for the utilization of both legislative and executive, private and public spheres of society as vehicles for transformative social change and to safeguard against violations of socio-economic rights. The volume will be of great interest to both public and private stakeholders, as well as professionals, including NGOs and think tanks, working in the areas of law, government, and public policy. It will also be immensely useful to academics and researchers of constitutionalism, policymaking and policy integration, social justice and minority rights.

No area of law and policy is more central to our well-being than housing, yet research on the topic is too often produced in disciplinary or methodological silos that fail to connect to policy on the ground. This pathbreaking book, which features leading scholars from a range of academic fields, cuts across disciplines to forge new connections in the discourse. In accessible prose filled with cutting-edge ideas, these scholars address topics ranging from the recent financial crisis to discrimination and gentrification and show how housing law

and policy impacts household wealth, financial markets, urban landscapes, and local communities. Together, they harness evidence and theory to capture the 'state of play' in housing, generating insights that will be relevant to academics and policymakers alike. Widely heralded as a "masterful" (Washington Post) and "essential" (Slate) history of the modern American metropolis, Richard Rothstein's *The Color of Law* offers "the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation" (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, "virtually indispensable" study that has

already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), *The Color of Law* forces us to face the obligation to remedy our unconstitutional past.

Renewable Energy Law and Policy covers the aspects of most renewable energy deals, including issues pertaining to structuring, real estate, finance, land use, contracts, environmental, corporate, tax, and securities law. As this nascent industry matures, and technology makes it increasingly more efficient to create electricity from the sun, wind, and geothermal resources, lawyers have begun seeing an increase in questions from landowners, project developers and non-renewable energy producers that are looking to grow in, or break into, the renewable energy sector. Legislators have also taken notice of the unprecedented potential and real growth over the last decade. This book helps practitioners, students, and laypeople navigate the complex and ever changing landscape of this new area of law. It was written to help the reader deal with this evolving reality by explaining the dynamics of the industry and the existing and developing regulatory and competitive environment. Among the important areas addressed are the following:

- Legal and policy issues that impact the development, implementation and commercialization of renewable energy projects.
- Structuring, land use, siting, and finance issues encountered by developers of renewable energy projects.
- Investing in renewable energy projects.
- Renewable energy development in other countries.
- Building a renewable energy project.
- Selling renewable energy.
- Tips for drafting and negotiating key renewable energy documents.

It offers information and insight to policymakers, medical and legal professionals, patients and other participants, and
