Tichy lays out six principles for his "Leadership Engine": Teaching, Learning, Ideas, Values, Energy, and Edge. Edge, he explains, is a leader's ability to face reality and make tough decisions, even if the end result is that the leader must step down for the good of the organization. (How many corporate leaders do you know who would do this?)

"This rapid-read handbook articulates the key concepts of the best-selling hardcover, The Leadership Engine: Building Leaders at Every Level, by Noel Tichy and Eli Cohen. Voted "one of the best business books of the year in 1997" by both BusinessWeek and Library Journal, it argues for making leadership development an embedded process in the way your organization operates."- Amazon.

In this Wall Street Journal and BusinessWeek bestseller, Michigan Business School guru and worldwide consultant Noel Tichy brings his special brand of organisational transformation to a practical level that guarantees a leader at every level of an organisation. Why do some companies consistently win in the marketplace while others struggle from crisis to crisis? The answer, says Noel Tichy, is that winning companies possess a "Leadership Engine" , a proven system for creating dynamic leaders at every level. Technologies, products and economies constantly change. To get ahead and stay ahead, companies need agile, flexible, innovative leaders who can anticipate change and respond to new realities swiftly. Tichy explains that everyone has untapped leadership potential that can be developed winning leaders and winning organisations have figured out how to do this. In this acclaimed bestseller, Tichy offers colourful and insightful best-practice examples from dozens of leaders gathered from decades of research and practical experience.

"With good judgment, little else matters. Without it, nothing else matters." Whether *we're* talking about United States presidents, CEOs, Major League coaches, or wartime generals, leaders are remembered for their best and worst judgment calls. In the face of ambiguity, uncertainty, and conflicting demands, the quality of a leader's judgment determines the fate of the entire organization. That's why judgment is the essence of leadership. Yet despite its importance, judgment has always been a fairly murky concept. The leadership literature has been conspicuously quiet on what, exactly, defines it. Does judgment differ from common sense or gut instinct? Is it a product of luck? Of smarts? Or is there a process for making consistently good calls? Noel Tichy and Warren Bennis have each spent decades studying and teaching leadership and advising top CEOs such as Jack Welch and Howard Schultz. Now, in their first collaboration, they offer a powerful framework for making tough calls when the stakes are high and the right path is far from obvious. They show how to recognize the critical moment before a judgment call, when swift and decisive action is essential, and also how to execute a decision after the call. Tichy and Bennis bring their three-dimensional model to life with interviews with world-class leaders who have thrived or suffered because of their judgment calls. These stories include: • Jeff Immelt, CEO of General Electric, whose judgment to grow through research and development transformed GE into the world's premier technology growth company. • Joel Klein, chancellor of the New York City Department of Education, who made tough calls about teachers, students, and parents while turning around a troubled school system. • Jim McNerney, CEO of Boeing, whose strategic judgment helped him reinvigorate his company and restore a culture of trust and respect. • The late general Wayne Downing, who found an unexpected opportunity in the midst of crisis when he led the Special Operations raid to capture Manuel Noriega. • A. G. Lafley, CEO of Procter & Gamble, who bet \$57 billion to purchase Gillette and reinvent his company. • Brad Anderson, CEO of Best Buy, who made the call to commit totally to a customer-centric strategy and led his people to execute it. Whether you're running a small department or a global corporation, judgment will give you a framework for evaluating any situation, making the call, and correcting if necessary during the execution phase. It will show you how to handle the overlapping domains of people, strategy, and crisis management. And it will help you teach your entire team to make the right call more often. No organization can afford to neglect this crucial discipline—and no previous book has ever brought it into such clear focus.

Noel Tichy has been the trusted adviser on management succession to companies including Royal Dutch Shell, Nokia, Intel, Ford, and Mercedes Benz. Succession distills his decades of experience and provides a practical framework for building effective transition pipelines - for multi-billion dollar conglomerates, family businesses or anything in between. Through revealing case studies - like Hewlett Packard, IBM, Yahoo and P&G - Tichy examines why some companies fail and others succeed in training and sustaining the next generation of senior leaders. He highlights the all too common mistakes that can generate embarrassing headlines and threaten survival. And he puts leadership development and succession where they belong: at the top of every leader's agenda.

Ofacinating... There is at least as much to be learned here as from reading Peter Drucker John Kenneth Galbraith or Michael Porter.Ó Boston Globe Acknowledged as the outstanding business leader of the late twentieth century, Jack Welch made General Electric one of the world's most competitive companies. This dynamic CEO defined the standard for organizational change, creating more than \$400 billion in shareholder value by transforming a bureaucratic behemoth into a nimble, scrappy winner in the global marketplace. Here, Tichy and Sherman extract the enduring leadership lessons from the revolution Welch wrought at GE. Of these, the most essential is the limitless power of learning. Leadership has its mysteries, but it is a skill that anyone can acquire and enhance. Above all, great leaders select great people and lure them into an endless process of learning and adaptation.

This book springs from presentations by a variety of top business leaders at the University of Michigan Business School. No other forum has brought together such combined practitioner-academic dialogue in response to the business revelations of 2002.

In The Leadership Engine, Noel Tichy showed how great companies strive to create leaders at all levels of the organization, and how those leaders actively develop future generations of leaders. In this new book, he takes the theme further, showing how great companies and their leaders develop their business knowledge into achable points of view,Open a great portion of their time giving their learnings to others, sharing best practices, and how they in turn learn and receive business ideas/knowledge from the employees they are teaching. Calling this exchange a virtuous teaching cycle, Professor Tichy shows how business builders from Jack Welch at GE to Joe Liemandt at Trilogy create organizations that foster this knowledge exchange and how their efforts result in smarter, more agile companies, and winning results. Some of these ideas were showcased in Tichy's recent Harvard Business Review article entitled, "Ordinary Boot Camp." Using examples from GE, Ford, Dell, Southwest Airlines and many others, Tichy presents and analyzes these principles in action and shows how managers can begin to transform their own businesses into teaching organizations and, consequently, better-performing companies

The Leadership Engine: How Winning Companies Build Leaders ...

How to transform an organization, based on fascinating, inside stories of major industrial companies and service companies (including Fortune 500 companies), aggressive smaller firms, and European companies. Provides insights into the styles and philosophies of leaders and executives who have transformed their companies, whether big or small, and offers practical advice on middle management's role in transforming large organizations.

A groundbreaking, evolutionary science-based exploration of the history of leadership that explains how and why some men and women evolve into good or great leaders, and some do not. We are all leaders or followers — or both. We can recognise leadership in almost every area of life: in the workplace, among friends, within families, in politics and religion. But what makes a good or bad leader, and what makes an outstanding one? Selected examines how and why leadership has evolved over tens of thousands of years, and presents a bold and compelling new "mismatch hypothesis": the slowness of evolution means that there is a mismatch between modern leadership and the kind of leadership that our Stone Age brains are still wired for. This makes for all sorts of tendencies, problems and solutions that no author has yet discussed but that affect all aspects of our lives. Full of fascinating examples drawn from a diverse range of spheres, from politics and commerce to sport and culture, Selected explains why taller political candidates usually win, why women chief executives attract such hostility, why we like it when the boss asks after our children and what prime ministers and presidents can do to improve their chances of electoral success. This is the first book of its kind — reaching into business, psychology, politics and current affairs — to explore how leadership affects us all. It also offers the first truly scientific theory of leadership: where previous books have provided anecdote, it details empirical evidence. Selected provides deep insight into our personal and professional lives at a time when the world urgently needs to acknowledge great leadership.
