A brand-new production of Andy Weir's modern sci-fi classic, narrated by the incomparable Wil Wheaton, and featuring bonus content from the writings of Mark Watney. Six days ago, astronaut Mark Watney became one of the first people to walk on Mars. Now, he's sure he'll be the first person to die there.

#1 NEW YORK TIMES BESTSELLER \* "Brilliant . . . a celebration of human ingenuity [and] the purest example of real-science sci-fi for many years . . . utterly compelling."--The Wall Street Journal The inspiration for the major motion picture Six days ago, astronaut Mark Watney became one of the first people to walk on Mars. Now, he's sure he'll be the first person to die there. After a dust storm nearly kills him and forces his crew to evacuate while thinking him dead, Mark finds himself stranded and completely alone with no way to even signal Earth that he's alive--and even if he could get word out, his supplies would be gone long before a rescue could arrive. Chances are, though, he won't have time to starve to death. The damaged machinery, unforgiving environment, or plain-old "human error" are much more likely to kill him first. But Mark isn't ready to give up yet. Drawing on his ingenuity, his engineering skills--and a relentless, dogged refusal to quit--he steadfastly confronts one seemingly insurmountable obstacle after the next. Will his resourcefulness be enough to overcome the impossible odds against him? NAMED ONE OF PASTE'S BEST NOVELS OF THE DECADE "A hugely entertaining novel [that] reads like a rocket ship afire . . . Weir has fashioned in Mark Watney one of the most appealing, funny, and resourceful characters in recent fiction."--Chicago Tribune "As gripping as they come . . . You'll be rooting for Watney the whole way, groaning at every setback and laughing at his pitchblack humor. Utterly nail-biting and memorable."--Financial Times

The Sunday Times Bestseller behind the major new film from Ridley Scott starring Matt Damon and Jessica Chastain. I'm stranded on Mars. I have no way to communicate with Earth. I'm in a Habitat designed to last 31 days. If the Oxygenator breaks down, I'll suffocate. If the Water Reclaimer breaks down, I'll die of thirst. If the Hab breaches, I'll just kind of explode. If none of those things happen, I'll eventually run out of food and starve to death. So yeah. I'm screwed.

In a one-of-a-kind graphic novel collaboration between the #1 New York Times bestselling author of The Martian and the beloved illustrator behind Sarah's Scribbles, Alice, Wendy, and Dorothy team up to save the multiverse, from Wonderland to Neverland and Oz. Originating as fan fiction from the brilliant imagination of Andy Weir, now brought to vivid life by Sarah Andersen, Cheshire Crossing is a funny, breakneck, boundlessly inventive journey through classic worlds as you've never seen them before. Years after their respective returns from Wonderland, Neverland, and Oz, the trio meet here, at Cheshire Crossing--a boarding school where girls like them learn how to cope with their supernatural experiences and harness their magical world-crossing powers. But Alice, Wendy, and Dorothy--now teenagers, who've had their fill of meddling authority figures--aren't content to sit still in a classroom. Soon they're dashing from one universe to the next, leaving havoc in their wake--and, inadvertently, bringing the Wicked Witch and Hook together in a deadly supervillain love match. To stop them, the girls will have to draw on all of their powers . . . and marshal a team of unlikely allies from across the magical multiverse. Advance praise for Cheshire Crossing "Deliciously funny . . . a shrewd and spirited adaptation that will leave audiences hoping for another installment . . . Andersen's delightful cartoon drawing style meshes perfectly with Weir's prose, allowing the work to broaden its appeal beyond middle graders to young adults and adults."--Kirkus Reviews (starred review)

John W. Campbell was the man who made modern science fiction what it is today. As editor of Astounding Stories (later Analog), Campbell brought into the field such all-time greats as Asimov, Heinlein, Sturgeon and many others, while his own writing blazed new trails in science fiction reading pleasure. The Moon is Hell is this great writer-editor's vision of the first men on the moon - written 18 years before Neil Armstrong made history. This is the story of the American space programme - not as it happened, but as it might have been.
