The Oystercatcher Pub Restaurant | Penarth | Hungry Horse The oystercatcher is a large, stocky, black and white wading bird. It has a long, orange-red bill and reddish-pink legs. In flight it shows a wide, white wing-stripe, a black tail and a white rump that extends as a 'V' between the wings. Because it eats cockles, the population is vulnerable if cockle beds are overexploited.

Yet I struggled with some of the storyline which seemed to drag on too long and with some of the peripheral characters who seemed slightly unbelievable.

"Emeline Powell had been born a country girl, in a small, whitewashed cottage on Honey's Farm. When her father died, Emmeline, bereft and lonely, married Joe Harries, a man much older than herself and one of the fishermen of Oystermouth. The wives of the oyster catchers were sturdy, stoic women, used to helping their men with the catch, and they didn't like the frail outsider who had married into their community. Nina Parks especially didn't like her - Nina was a widow who thought Joe Harries should have been hers. Emmeline - Eline - grew more isolated, more unhappy, trapped into an ill-matched marriage without friends to help her. And then she met Will Davies. Will was to open new worlds to her, worlds of personal achievement, the unfolding of a talent she never knew she possessed, and the realisation that she knew how to love. As tragedy and passionate feuding began to erupt in the oyster village, so Eline clung to her integrity, her ability to work, and her hopes for the future."

Susan Cerulean's memoir trains a naturalist's eye and a daughter's heart on the lingering death of a beloved parent from dementia. At the same time, the book explores an activist's lifelong search to be of service to the embattled natural world. During the years she cared for her father, Cerulean also volunteered as a steward of wild shorebirds along the Florida coast. Her territory was a tiny island just south of the Apalachicola bridge where she located and protected nesting shorebirds, including least terns and American oystercatchers. I Have Been Assigned the Single Bird weaves together intimate facets of adult caregiving and the consolation of nature, detailing Cerulean's experiences of tending to both. The natural world is the "sustaining body" into which we are born. In similar ways, we face not only a crisis in numbers of people diagnosed with dementia but also the crisis of the human-caused degradation of the planet itself, a type of cultural dementia. With I Have Been Assigned the Single Bird, Cerulean reminds us of the loving, necessary toil of tending to one place, one bird, one being at a time.
