As time progressed - and his penchant for anything sweet, fatty or fizzy persisted - he found himself adjusting his belt, loosening his collar and upsizing his wardrobe to XXL. He continued to pile on the pounds when he entered the world of politics as MP for West Bromwich East (despite short-lived flirtations with fad diets and fitness classes). By December 2014, his bathroom scales had tipped to 22 stone. After being diagnosed with type 2 diabetes in late 2015, he decided to take control of his diet and exercise. He started to feel better quickly and within a short time his long-term blood sugar levels were within normal range. By July 2018, he came off medication.

You can take control of your health, lose weight, prevent disease, and enjoy a long and healthy life. The unique nutritional program outlined in Eat Rich, Live Long is designed by experts to help you feel great while you eat delicious and satisfying foods. Millions of people have gotten healthy through low-carb plans over the years--and a growing number have discovered the wonderful benefits of ketogenic (Keto) nutrition. Many are confused, though, about how low-carb they should go. Now, Eat Rich, Live Long reveals how mastering the low-carb/Keto spectrum can maximize your weight loss and optimize your health for the long term. In this book, Ivor Cummins, a world-class engineer and technical master for a huge global tech corporation, and Dr. Jeff

Gerber, a family doctor who is widely regarded as a global leader in low-carb nutrition, team up to present their unique perspectives from their extensive clinical, medical, and scientific/research experience. Together, Cummins and Gerber crack the code that shows you how to eat the foods you enjoy, lose weight, and regain robust health. They reveal how the nutritional "experts" have gotten it so wrong for so long by demonizing healthy natural fats in our diets and focusing on cholesterol and LDL as the villains. In fact, as the authors reveal by drawing on the latest peer-reviewed global research, eating a high percentage of natural fats, a moderate amount of protein, and a low percentage of carbs can help you lose weight, prevent disease, satisfy your appetite, turn off your food cravings, and live longer. The

heart of Eat Rich, Live Long is the book's prescriptive program, which includes a 7-day eating plan, a 14-day eating plan, and more than 50 gourmet-quality low-carb high-fat recipes -- illustrated with gorgeous full-color photographs -- for breakfasts, lunches, appetizers, snacks, dinners, drinks, and desserts. Low-carb never tasted so good! Nutritional sacred cows are constantly being challenged in the media. How much fat should we eat -- and which kinds of fats are best? Which fats can contribute to diabetes, heart disease, and early mortality? Does a high-protein diet increase muscle mass and lead to vigorous health -- or can it promote aging, cancer, and early mortality? Which vitamins and minerals should we be taking, if any? How do we change our metabolism so that our bodies burn fat instead of all the

research and the latest findings on appetite and weight. Metabolic specialist Ron Rosedale, M.D., has designed the Rosedale Diet to regulate the powerful hormone leptin, which controls appetite and weight loss by telling the brain when to eat, how much to eat—and when to stop. New research shows that leptin may be one of the body's most important hunger control mechanisms. Control leptin, and you control your weight. Most people's leptin levels are out of control, causing them to overeat and to store fat rather than burn it. The only way to flip the "hunger switch" back to normal is through a diet high in healthy fats and low in carbohydrates, saturated fat, and trans-fatty acids often found in processed food—plus just 15 minutes of daily exercise. Dr. Rosedale's 21-day diet plan is simple: Just select from the many foods on his "A" list,

including "healthy-fat" foods such as avocados, nuts, olives, lobster, crab, shrimp, goat cheese, Cornish game hen, venison, and more. Then gradually add foods from the "B" list, such as steak, lamb chops, fruits, beans, and so on. A 28-day menu plan and more than 100 recipes, such as Dilled Salmon and Fresh Asparagus, Gingery Chicken Soup, Lasagna, Black Bean Wrap, Raspberry Mousse Cake, and French Silk Pie, make eating the Rosedale way deliciously easy. Weight loss is just the beginning. The Rosedale Diet will make you feel satisfied, reduce cravings, and put you in control of your "sweet tooth." It can even help eliminate or reduce heart disease, hypertension, diabetes, and other conditions associated with "natural" aging, as many of Dr. Rosedale's patients can attest. Statins are widely prescribed to lower blood cholesterol levels and claim to offer unparalleled protection against heart disease. Believed to be completely safe and capable of preventing a whole series of other conditions, they are the most profitable drug in the history of medicine. In this groundbreaking book, GP Malcolm Kendrick exposes the truth behind the hype. He will change the way we think about

cholesterol forever. Rubbishing the diet-heart hypothesis, in which clinical trials 'prove' that high cholesterol causes heart disease and a high-fat diet leads to heart disease, Kendrick lambastes a powerful pharmaceutical industry and unquestioning medical profession, who, he claims, perpetuate the madcap concepts of 'good' and 'bad' cholesterol and cholesterol levels to convince millions of people to unnecessarily spend billions of pounds on statins. Clearly and comprehensively debunking assumptions on what constitute a healthy lifestyle and diet, "The Great Cholesterol Con" is the accessible, indispensable and absorbing case against statins and for a more common-sense approach to heart disease and general wellbeing. No more over-hyped miracle drugs; no more garlic, red wine, anti-oxidants, fruit or vegetables; even
