Is this nosy trash panda a sleuth or a suspect? Lately my life has seemed pretty perfect—great house, great gig as my own boss, great new boyfriend, and the world's most awesome talking cat. Turns out I shouldn't have let my guard down— Even though my private investigation firm is brand new, I've already got some not-so-friendly competition, and it's coming from the sticky-fingered raccoon who lives under my front porch. I have no doubt he's robbing his clients since he's stealing from mine, too. Things go from irritating to downright dangerous when he foists a little trinket from my attic, one that suggests dark secrets and spells big trouble for my beloved Nan. I need to learn more, but that's not going to be easy since the person of interest lives under the same roof. Can I trust this raccoon racketeer with something so dear? Unfortunately, I haven't got any other options.

On January 20, 1999, President Bill Clinton announced in his State of the Union address that the Justice Department was planning to sue the tobacco industry and assigned the task to Attorney General Janet Reno and the Justice Department. This book is the story of that case - the politics, the litigation, the behavior of the industry and its lawyers, the efforts by the Bush Administration to gut the case, and the ultimate victory in court. Bad Acts tells the story, not yet fully revealed, of what was happening behind the scenes at the Justice Department as the case approached victory, when the Bush Administration intervened, with some success, to protect Big Tobacco. The book examines the political influences and interferences of and by Clinton Democrats and George W. Bush Republicans. It is a candid behind-the-scenes account of how the case was put together, how the industry attempted to halt the case, and how it ultimately was won by the Justice Department.
