This book describes a new structural system in wood that represents the first significant challenge to concrete and steel structures since their inception in tall building design more than a century ago. The introduction of these ideas is driven by the need to find safe, carbon-neutral and sustainable alternatives to the incumbent structural materials of the urban world. The potential market for these ideas is quite simply enormous. The proposed solutions have the potential to revolutionize the building industry, address the major challenges of climate change, urbanization, and sustainable development and to significantly contribute to world housing needs.

Over the past 20 years UWB has been used for radar, sensing, military communications and niche applications. However, since the FCC ruling in 2002, which allowed the commercial operation of UWB for data communications, UWB has changed dramatically. Implementation oriented, this volume explores the fundamentals of UWB technology with particular emphasis on impulse radio (IR) techniques. It explains the key physical layer aspects of UWB technology, especially in communications and in control applications, and examines the multiple access (MAC) issues which are emerging as a hot area for practical UWB systems. Offers practical information about implementation Addresses issues of modulation possibilities, appropriate circuits for UWB, an example circuit design, MAC protocol issues and use of UWB for positioning applications Includes a literature survey examining books, articles and conference papers presenting the basic features of UWB technology and current systems Features a patent database search providing a historical perspective to the state-of-the-art technology UWB Theory and Applications will be indispensable to researchers interested in the practical issues of UWB technology and realistic assumptions of UWB, as well as engineers interested in implementing UWB devices.

A woman desperate to turn a new page heads to the Scottish coast and finds herself locked in a battle of wills with an infuriatingly aloof bookseller in this utterly heartwarming debut, perfect for readers of *Evvie Drake Starts Over*. "Humor and charm abound. . . . [This] love story hits the spot."—Publishers Weekly
Thea Mottram is having a bad month. She's been let go from her office job with no notice—and to make matters even worse, her husband of nearly twenty years has decided to leave her for one of her friends. Bewildered and completely lost, Thea doesn't know what to do. But when she learns that a distant great uncle in Scotland has passed away, leaving her his home and a hefty antique book collection, she decides to leave Sussex for a few weeks. Escaping to a small coastal town where no one knows her seems to be exactly what she needs. Almost instantly, Thea becomes enamored with the quaint cottage, comforted by its cozy rooms and lovely but neglected garden. The locals in nearby Baldochie are just as warm, quirky, and inviting. The only person she can't seem to win over is bookshop owner Edward Maltravers, to whom she hopes to sell her uncle's book collection. His gruff attitude—fueled by an infamous, long-standing feud with his brother, a local lord—tests Thea's patience. But bickering with Edward proves oddly refreshing and exciting, leading Thea to develop feelings she hasn't experienced in a long time. As she follows a thrilling yet terrifying impulse to stay in Scotland indefinitely, Thea realizes that her new life may quickly become just as complicated as the one she was running from.

Tall Wood buildings' have been at the foreground of innovative building practice for a number of years. From London to Stockholm, from Vancouver to Melbourne timber buildings of up to 20 storeys have been built or designed. This publication explains the typical construction types and documents an international selection of 13 case studies with many specially prepared construction drawings, demonstrating the range of the technology.

We had become the land of flickering lights, in which the standard of success was not what we were doing for the next generation of Americans, or to enhance our role in the world, but instead whether we had kept government open for another few minutes."—Michael Bennet
The Land of Flickering Lights is a unique contribution to American political writing at this or any other time. Senator Michael Bennet lifts a veil on the inner workings of Congress to reveal, in his words, "through a series of actual stories—about the people, the politics, the motives, the money, the hypocrisy, the stakes, the outcome—the pathological culture of the capital and the consequences for us all." Bennet unfolds the dramatic backstory behind five episodes crucial to the well-being of all Americans. Each of them exemplifies the hyper-partisan politics that have upended our democracy: The highly politicized confirmation battles over judicial nominations at all levels—epitomized by ugly and unprincipled fights over seats on the Supreme Court; The passage of the Trump tax law, which massively increased our national debt and widened economic inequality across the country; The shredding of the Iran nuclear deal, which undermined our national security, caused friends and foes alike to doubt America's word, and made a mockery of the longstanding bipartisan tradition in foreign policy; The pervasive corruption unleashed by "dark money" in policies and how big donors have been able to stymie urgent action on climate change and many other issues; The sabotage by a congressional minority of the "Gang of Eight's" bi-partisan deal to reform America's immigration policies, a deal that would have comprehensively addressed the immigration issues that bedevil us to this day. With frankness and refreshing candor, and in elegant prose, Bennet pulls the machinations behind these episodes into full public view, shedding vital new light on our political dysfunction today. Arguing that each of us has a duty to act as a founder, he will inspire Americans of all political persuasions to demand that the "winners" of our political battles be all the American people, nor one party or the other.
