Explore how entrepreneurial thinking can dramatically improve your work, life and relationships Having the drive, ambition and inspiration to start a new business takes a special mind-set and self-confidence—think Steve Jobs, Elon Musk, Mark Zuckerberg. It's no wonder that we regard successful entrepreneurs as modern-day magicians, transforming sometimes-radical ideas into global brands that change the way we live our lives. But what if that spirit and drive were applied to the world outside of business start-ups? An entrepreneur seeks to build something from nothing, to take an inspired idea and make it a reality. In How to Think Like an Entrepreneur, Philip Delves Broughton will explore what it takes to be a successful entrepreneur—the ability to disrupt the status quo and generate fresh perspectives—and ultimately lead us to the heart of great entrepreneurial thinking: an understanding of our deepest human needs. By harnessing the passion, verve and limitless imagination of an entrepreneur, this book will show you new ways to improve your business, but also your life and relationships. "Self-help books for the rest of us." - The New York Times

It used to be that if you studied and worked hard, you could be assured of an extremely satisfying career. But in a world of constant layoffs and dying industries, it has become increasingly difficult to "plan" your way to success. So what is the solution? Well, when it comes to dealing with uncertainty, nobody handles it better than successful entrepreneurs. That's why you want to take the same approach they do! Based on extensive research and interviews, Own Your Future shows how to apply the simple model they use--Act. Learn. Build. Repeat--to reinvent the way you maneuver in an unpredictable job market. Here's how it works. Instead of picturing your perfect career and working backwards, simply begin with the direction you want to go and take a small step. Thinking alone will never change your life--you must ACT. Then evaluate the lessons you learn from that first step, build on them, and take another step in your desired direction. Repeat this process until you have achieved your goal. When you consider that your job--perhaps even your industry--may disappear, you have no choice but to take control. Filled with stories of professionals of all kinds who have profited from this proactive approach, Own Your Future gives you the tools you need to succeed--no matter what comes your way.

What makes an entrepreneur successful? The latest scientific research revealed in this book demonstrates that entrepreneurial thinking can be easily developed by everyone and is far more than creative thinking, idea generation or brain-storming techniques. What makes serial entrepreneurs successful is their personal mindset. What is less known is how their internal process develops their mindset to perform at the highest level. And it is much more than their ability to tolerate high risk or failure. The entrepreneur develops their personal mindset from an inner perspective, they trust that clarity will emerge from intuition to inform the initial idea or vision for a business. This intuition is beyond the brain, it appears in the heart, gut and internal organs. We have a unique intuitive intelligence and you will learn just how entrepreneurs use this information to both attract and create a successful business. This formula is the GPS for your entrepreneurial success. This formula has never been revealed outside the academic world. Through interviews with scientists, serial entrepreneurs and business thinkers about their individual experiences and with proven application and techniques, Jane Mara has unlocked the key to what makes serial entrepreneurs successful. Jane Mara's Think Like an Entrepreneur: The Mindset of Success demystifies how serial entrepreneurs behave and what it takes to create successful business ventures. Importantly her research has focused on seeking an understanding of how successful repeat entrepreneurs integrate intuition and intentionality into recognising opportunities for business innovation and development. Jane has proven that this formula is accessible for all who wish to adopt more entrepreneurial thinking. "Don't let the noise of others' opinions drown out your own inner voice. And most important, have the courage to follow your heart and intuition." Steve Jobs

Rethink your way to a better life In business, and in life, everything is changing fast, apart from how we behave. Our ways of thinking and making decisions have changed little since we lived in agricultural and industrial societies, but the problems we now need to solve are entirely different. It requires a revolution in thinking and behavior to meet the challenges that now face us and avoid disaster we need to totally rethink the model. Part business biography, part business blueprint, Total Rethink explains how this can be done. Successful telecoms entrepreneur David McCourt lays out the reality of the dangerous situation we find ourselves in and suggests solutions which will empower everyone, including business people, politicians, diplomats, and teachers, to repair the damage we have already done, and prepare for the dramatic changes to come. • Change the way you think and behave to be a true entrepreneur • Understand why incremental change no longer works • Move at the speed of the times we're living in to keep up • Find trusted, effective guidance you can put to practice today Written by a sought-after speaker, businessman, and entrepreneur, the advice inside this book will help you learn to think—and live—like a revolutionary.

You aspire to lead with greater impact. The problem is you're busy executing on today's demands. You know you have to carve out time from your day job to build your leadership skills, but it's easy to let immediate problems and old mind-sets get in the way. Herminia Ibarra—an expert on professional leadership and development and a renowned professor at INSEAD, a leading international business school—shows how managers and executives at all levels can step up to leadership by making small but crucial changes in their jobs, their networks, and themselves. In Act Like a Leader, Think Like a Leader, she offers advice to help you: • Redefine your job in order to make more strategic contributions • Diversify your network so that you connect to, and learn from, a bigger range of stakeholders • Become more playful with your self-concept, allowing your familiar—and possibly outdated—leadership style to evolve Ibarra turns the usual "think first and then act" philosophy on its head by arguing that doing these three things will help you learn through action and will increase what she calls your oversight—the valuable external perspective you gain from direct experiences and experimentation. As opposed to insight, oversight will then help change the way you think as a leader: about what kind of work is important; how you should invest your time; why and which relationships matter in informing and supporting your leadership; and, ultimately, who you want to become. Packed with self-assessments and practical advice to help define your most pressing leadership challenges, this book will help you devise a plan of action to become a better leader and move your career to the next level. It's time to learn by doing.

The most dangerous move in business is the failure to make a move. Global business celebrity and prime-time Bloomberg Television host, Jeffrey W. Hayzlett empowers business leaders to tie their visions to actions, advancing themselves past competitors and closer to their business dream. Drawing upon his own business back stories including his time as CMO of Kodak and sharing examples from the many leaders featured on "The C-Suite with Jeff Hayzlett," Hayzlett imparts ten core lessons that dare readers to own who they are as a leader and/or company, define where they want to go, and fearlessly do what it takes to get there—caring less about conventional wisdom, re-framing limitations, and steamrolling obstacles as they go.
