This is the seventh edition of the leading work on transnational and comparative commercial, financial, and trade law, covering a wide range of complex topics in the modern law of international commerce, finance and trade. As a guide for students and practitioners it has proven to be unrivalled. The work is divided into three volumes, each of which can be used independently or as part of the complete work. Volume 2 deals with the transnationalisation of contract; movable and intangible property law; and the transformation of the models of contract and movable property in commercial and financial transactions between professionals in the international flow of goods, services, money, information, and technology. In this transnational legal order, the emphasis in the new law merchant or modern lex mercatoria of contract and movable property turns to risk management, asset liquidity, and transactional and payment finality. Common law and civil law concepts are compared and future directions indicated. The potential, effects, and challenges of the blockchain are noted, so far especially for the carriage of goods by sea. All three volumes may be purchased separately or as part of a single set.

Macao Business and Investment Opportunities Yearbook Volume 2 Leading Export-Import, Business, Investment Opportunities and Projects

Sarawak, Malaysia is the second in the trilogy on Borneo and is a travelogue on rainforest and its Indigenous Peoples. Sarawak opens its heart of darkness, the rainforest when Frans Welman visits the interior and meets the peoples of the rainforests, Indigenous Peoples and peoples who exploit this rich and diverse ecosystem and habitat, Kayan, Kelabit and Bidayah Peoples.

A detailed examination of WTO agreements regulating trade in goods, discussing legal context, policy background, economic rationale, and case law. The General Agreement on Tariffs and Trade (GATT) has extended its institutional arsenal since the Kennedy round in the early 1960s. The current institutional design is the outcome of the Uruguay round and agreements reached in the ongoing Doha round (begun in 2001). One of the institutional outgrowths of GATT is the World Trade Organization (WTO), created in 1995. In this book, Petros Mavroidis offers a detailed examination of WTO agreements regulating trade in goods, discussing legal context, policy background, economic rationale, and case law. Each chapter examines a given legal norm and its subsequent practice. In particular, he discusses agreements dealing with customs clearance; “contingent protection” instruments, which allow WTO members unilaterally to add to the negotiated amount of protection when a certain contingency (for example, dumping) has occurred; TBT (Technical Barriers to Trade) and SPS (Sanitary and Phyto-sanitary Measures) agreements, both of which deal with such domestic instruments as environmental, health policy, or consumer information; the agreement on Trade Related Investment Measures (TRIM); sector-specific agreements on agriculture and textiles; plurilateral agreements (binding a subset of WTO membership) on government procurement and civil aviation; and transparency in trade relations. This book’s companion volume examines the GATT regime for international trade.

This unique title examines in depth issues of jurisdiction, maritime law and practice from a modern perspective and highlights the importance of risk management with a view to avoiding pitfalls in litigation or arbitration and minimising exposure to liabilities. The third edition has been fully revised and restructured into two self-contained volumes, the first covering jurisdictional issues and risks and the second exploring the diverse aspects of maritime law, risks and liabilities. The second volume tackles the substantive maritime law with a particular emphasis on risk and liabilities, and analyses issues of contract, tort and criminal law, causation and remoteness of damages. Key features of Volume Two include: An analysis of the regulatory regime, new EU and IMO safety at sea legislation, reforming practices for flag states and recognised organisations, vetting, codes of good practice, and International Conventions. An explanation of the Rules of attribution of liability, the impact of the ISM Code upon liabilities, including criminal, corporate manslaughter, and the new Directive for ship-source pollution. Important developments in areas including: Ship-managing risks, best endeavours and fiduciary duties Mortgagees risks and economic torts New BIMCO standard terms of contracts Ship-sale risks – including sale ‘as is’ and ‘as she was’ Shipbuilding risks – guarantees and performance bonds New trends on wrongful acts of employees, collisions and measure of damages, salvage issues, environmental salvage, and towage contracts Piracy risks cases and general average New perspectives on risks and liabilities of port authorities Pollution liabilities, including trends of prosecution of class societies and charterers and new limits of liability under International Conventions Purchase Volumes 1 and 2 of the Modern Maritime Law together for a reduced price at <http://www.routledge.com/books/details/9780415843201/>

The Collected Courses of the Xiamen Academy of International Law contain the Summer Courses taught at the Xiamen Academy of International Law by highly qualified international legal professionals.

Algeria Investment and Business Guide Volume 2 Business, Investment Opportunities and Incentives

The history of Commonwealth Engineering spans some 70 years. Comeng Vol. 2 traces the company’s activities from 1955 to 1966. The range of activities was diverse from curtain walling for high rise office buildings to the use of glass-reinforced plastic in road, rail and general applications. The book is given life by the personal accounts of those who worked in the plants in NSW, Qld, Vic and WA. Their memories and anecdotes illuminate this history of Australia’s industrial and manufacturing development.
