This book gathers high-quality research papers presented at the 2nd AUE international research conference, AUEIRC 2018, which was organized by the American University in the Emirates, Dubai, and held on November 13th-15th, 2018. The book is broadly divided into two main sections: Sustainability and Smart Business, and Sustainability and Creative Industries. The broad range of topics covered under these sections includes: risk assessment in agriculture, corporate social responsibility and the role of intermediaries, the impact of privatizing health insurance, political events and their effect on foreign currency exchange, the effect of sustainable HR practices on financial performance, sustainability integration in the supply chain and logistics, gender inequality in the MENA economies, the panel data model, the model of sustainable marketing in the era of Industry 4.0, micro-enterprises as a tool for combating unemployment, the impact of financial education and control on financial behavior, measuring financial and asset performance in agricultural firms, a comprehensive strategic approach to sustainability in the UAE, sustainability and project finance, HR analytics, FaD or fashion for organizational sustainability, a conceptual framework of sustainable competitive advantages, psychology of organizational sustainability, Blockchain technology and sustainability, veganism and sustainability, institution building from an emotional intelligence perspective, sustainable concrete production using CWP, occupants' behavior and energy usage in Emirati houses, the effect of shop lighting on consumer behavior, multimedia applications in digital transformation art, integrating biomimicry principles in sustainable architecture, experimental sustainable practices in fashion education, technology-assisted student-centered learning for civil engineering, and a 10-step design process for architectural design studios. All contributions present high-quality original research work, findings and lessons learned in practical development.

An award-winning professor of economics at MIT and a Harvard University political scientist and economist evaluate the reasons that some nations are poor while others succeed, outlining provocative perspectives that support theories about the importance of institutions.

Published in the year 1971, The History of Education in Ghana is a valuable contribution to the field of History.

Document from the year 2017 in the subject Mathematics - Miscellaneous, University of Cape Coast (University of Cape Coast), course: Mphil Mathematics Education, language: English, abstract: This is an instruction guide to the Casio fx-991ES/Plus calculator. It gives an overview of the functions of the calculator and presents some exercises to get acquainted with the functions.

Ghana National Health Insurance Scheme (NHIS) was established in 2003 as a major vehicle to achieve the country's commitment of Universal Health Coverage. The government has earmarked value-added tax to finance NHIS in addition to deduction from Social Security Trust (SSNIT) and premium payment. However, the scheme has been running under deficit since 2009 due to expansion of coverage, increase in service use, and surge in expenditure. Consequently, Ghana National Health Insurance Authority (NHIA) had to reduce investment fund, borrow loans and delay claims reimbursement to providers in order to fill the gap. This study aimed to provide policy recommendations on how to improve efficiency and financial sustainability of NHIS based on health sector expenditure and NHIS claims expenditure review. The analysis started with an overall health sector expenditure review, zoomed into NHIS claims expenditure in Volta region as a miniature for the scheme, and followed by identification of factors affecting level and efficiency of expenditure. This study is the first attempt to undertake systematic in-depth analysis of NHIS claims expenditure. Based on the study findings, it is recommended that NHIS establish a stronger expenditure control system in place for long-term sustainability. The majority of NHIS claims expenditure is for outpatient consultations, district hospitals and above, certain member groups (e.g., informal group, members with more than five visits in a year). These distribution patterns are closely related to NHIS design features that encourages expenditure surge. For example, year-round open registration boosted adverse selection during enrollment, essentially fee-for-service provider mechanisms incentivized oversupply but not better quality and cost-effectiveness, and zero patient cost-sharing by patients reduced prudence in seeking care and caused overuse. Moreover, NHIA is not equipped to control expenditure or monitor effect of cost-containment policies. The claims processing system is mostly manual and does not collect information on service delivery and results. No mechanisms exist to monitor and correct providers' abnormal behaviors, as well as engage NHIS members for and engaging members for information verification, case management and prevention.

Perceptions of Africa have changed dramatically. Viewed as a continent of wars, famines and entrenched poverty in the late 1990s, there is now a focus on "Africa rising † ? and an "African 21st

century. † ? Two decades of unprecedented economic growth in Africa should have brought substantial improvements in well-being. Whether or not they did, remains unclear given the poor quality of the data, the nature of the growth process (especially the role of natural resources), conflicts that affect part of the region, and high population growth. Poverty in a Rising Africa documents the data challenges and systematically reviews the evidence on poverty from monetary and nonmonetary perspectives, as well as a focus on dimensions of inequality. Chapter 1 maps out the availability and quality of the data needed to track monetary poverty, reflects on the governance and political processes that underpin the current situation with respect to data production, and describes some approaches to addressing the data gaps. Chapter 2 evaluates the robustness of the estimates of poverty in Africa. It concludes that poverty reduction in Africa may be slightly greater than traditional estimates suggest, although even the most optimistic estimates of poverty reduction imply that more people lived in poverty in 2012 than in 1990. A broad-stroke profile of poverty and trends in poverty in the region is presented. Chapter 3 broadens the view of poverty by considering nonmonetary dimensions of well-being, such as education, health, and freedom, using Sen's (1985) capabilities and functioning approach. While progress has been made in a number of these areas, levels remain stubbornly low. Chapter 4 reviews the evidence on inequality in Africa. It looks not only at patterns of monetary inequality in Africa but also other dimensions, including inequality of opportunity, intergenerational mobility in occupation and education, and extreme wealth in Africa.

Assuming no prior knowledge, the second edition of Foundations of Economics introduces students to both microeconomic and macroeconomic principles. This is the ideal text for foundation degrees and non-specialist courses for first year undergraduates.
